Introduction

AEM Coil Drivers are custom manufactured to AEM's specifications by HUCO Electronic GmbH in their ISO 9001 facility in Germany. They are specifically designed by AEM for driving the high power dwell controlled ignition coils commonly found on performance engines.

Kit Contents

The **30-2843** Kit contains:

- Three Channel Coil Driver
- Seven Pin Mating Connector
- Seven Terminals & Wire seals
- Thermal Grease

Installation

It is critical that this driver module be mounted to a flat metallic surface and that the supplied thermal grease applied between the module and its mounting surface (units that do not include an integral heat sink). This is required to allow the heat generated to be conducted away. Failure to mount the driver in this manner will cause a premature failure and will void the warranty.

Trigger Setup

Pay special attention when connecting this unit as improper wiring or incorrect ECU configuration can destroy the module, your coils or your ECU. If you are not 100% sure of your configuration do not power up the system until you are. This module takes a 5V logic level trigger signal (falling edge trigger) which is configured to fire the coil on its falling edge and converts it to a switched ground where the ignition coil is grounded when the input signal is high and the ignition coil is fired (disconnected) when the input signal falls from 5V to ground.

Electrical Connections

12 Month Limited Warranty

Advanced Engine Management Inc. warrants to the consumer that all AEM High Performance products will be free from defects in material and workmanship for a period of twelve (12) months from date of the original purchase. Products that fail within this 12-month warranty period will be repaired or replaced at AEM's option, when determined by AEM that the product failed due to defects in material or workmanship. This warranty is limited to the repair or replacement of the AEM part. In no event shall this warranty exceed the original purchase price of the AEM part nor shall AEM be responsible for special, incidental or consequential damages or cost incurred due to the failure of this product. Warranty claims to AEM must be transportation prepaid and accompanied with dated proof of purchase. This warranty applies only to the original purchaser of product and is non-transferable. All implied warranties shall be limited in duration to the said 12-month warranty period. Improper use or installation, accident, abuse, unauthorized repairs or alterations voids this warranty. AEM disclaims any liability for consequential damages due to breach of any written or implied warranty on all products manufactured by AEM. Warranty returns will only be accepted by AEM when accompanied by a valid Return Merchandise Authorization (RMA) number. Product must be received by AEM within 30 days of the date the RMA is issued.

UEGO oxygen sensors are considered wear items and are not covered under warranty.

Please note that before AEM can issue an RMA for any electronic product, it is first necessary for the installer or end user to contact the EMS tech line at 1-800-423-0046 to discuss the problem. Most issues can be resolved over the phone. Under no circumstances should a system be returned or a RMA requested before the above process transpires.

AEM will not be responsible for electronic products that are installed incorrectly, installed in a non-approved application, misused, or tampered with.

Any AEM electronics product can be returned for repair if it is out of the warranty period. There is a minimum charge of \$50.00 for inspection and diagnosis of AEM electronic parts. Parts used in the repair of AEM electronic components will be extra. AEM will provide an estimate of repairs and receive written or electronic authorization before repairs are made to the product.
